

myLexia® Educator Platform

The myLexia Educator Platform offers real-time progress monitoring of student performance and language proficiency, providing educators with actionable data to support student achievement in a personalized way.

OVERVIEW

myLexia utilizes sophisticated technology to provide educators with simple, actionable data and reports that help inform instruction. Our patented system, **Assessment Without Testing®**, gathers and analyzes data as students work through the Lexia® English Language Development™ online content and, based on individual student performance, recommends lessons for teacher-facilitated peer-to-peer speaking and listening practice.

FEATURES AND BENEFITS

The Educator Platform offers educators and administrators insights and information to help them adjust instruction and secure better learning outcomes for all. Here's what sets it apart:

Real-time actionable data

- Empowers educators to transform instruction, personalize learning for each student, and make data-informed instructional decisions
- Helps administrators monitor the fidelity of implementation and gain visibility into how their schools and districts are performing to ensure the success of both their educators and Emergent Bilinguals

Information on student skills, strengths, and weaknesses

- Allows educators to monitor learners' performance continuously, with instant access to student scores, program usage, and instructional next steps to accelerate students' language proficiency
- Enables educators to facilitate and prioritize small-group instruction

Teacher-led, offline, and printable resources

- Allows educators to address individual needs and provide further support for students or groups of students who struggle with specific grammar skills

The **student overview** report reveals areas of strengths and weaknesses, progress and recent usage, lesson recommendations, and more.

Class usage can help administrators monitor the fidelity of implementation.

Why is continuous access to student progress data critical for educators and administrators?

We know that for educators it can be challenging to find the time, data, and resources required to offer the differentiated instruction that will empower all of their Emergent Bilingual students to thrive. Teachers historically receive a single language proficiency test score only once a year, meaning most educators lack the actionable and ongoing progress-monitoring data they need to help inform instruction. Emergent Bilingual students' proficiency also varies significantly from student

to student; without a clear, consistent way of evaluating speaking and listening, grouping learners for instruction can prove challenging.

Administrators typically search for a better way to monitor performance at the student, class, and district levels. They must also be able to quickly identify opportunities for professional development to better support their teaching personnel.

What types of reports and student information does the platform provide?

Report types include:

- Placement reports
- Program usage
- Student skills and performance scores
- Class instructional planning
- Proficiency status and band (WIDA, CA ELD, TX ELPS, ELPA 21, and NY ESL)
- School and district overview

Reports provide educators with data at the class, student, and grade levels, as well as small-group recommendations based on students' online performance and areas of improvement. Administrators and district leaders can also access data at the school and district levels.

These reports are designed to help answer questions around students' program use and instructional next steps, such as:

- At what level of content are my students working?
- How much time are my students spending on the program each week?
- How much more content do my students have to complete to finish their program level?
- What instructional resources would students benefit from?
- How should I prioritize my instructional time with students?
- Which students should I pair or group together for conversational practice?
- Where can I find more detail on the frequency of staff logins to myLexia?

What additional resources does the platform offer?

The Resources Hub offers a variety of additional teacher-led, offline lessons and tools for educators to support learning in their classroom. It also includes additional classroom resources, tools to celebrate student achievement, and professional learning documents.

Teacher-led, Lexia Lessons® offer students an opportunity to further practice their speaking and listening skills. The platform flags students who score below a certain percentage on any Presentation of Knowledge unit and provides the educator with lessons and small-group recommendations. These lessons are group-centric, promoting conversations between peers in addition to one-to-one student-teacher interaction.

The right technology

It's easy to get students started, with support for Clever Instant Login and Single Sign-On (SSO) via SAML 2.0. The platform also supports Clever Secure Sync and IMS Global's OneRoster™ standards to provide and maintain student, staff, and class information.

ABOUT LEXIA LEARNING

Lexia Learning, a Cambium Learning® Group company, is the structured literacy expert. For over 35 years, the company has focused solely on literacy, and today, provides a full spectrum of solutions for both students and teachers. With robust offerings for differentiated instruction, personalized learning, assessment, and professional learning, Lexia helps more learners read, write, and speak with confidence. For more information, visit www.lexialearning.com.
